## Impact of earthquake in Turkey and Syria

Dear Customers Partners and Friends,

in light of the earthquake that sadly hit Turkey and Syria (and also neighboring countries) on the morning of Monday 6 February 2023, we as MG International would like to inform you of the subsequent impact on operations and services.

Such was the magnitude of the earthquake that there has been significant damage to logistics and transport infrastructure around the Pazarcik, Kahramanmaras, epicentre, including at the Port of Iskenderun. The port has unfortunately been subject to severe structural damage, leading to a complete stop of all operations until further notice.

Roads from the region of Mersin/Adana towards Iraq have also been heavily affected. This may cause serious impact on the highly frequented trucking route from Turkey to Northern Iraqi Territory.

As of today it is not yet clear when the operations will be coming back to normal.

MG International would also like to extend its deepest sympathies to those affected by the disaster.

Our thoughts are with our friends and partners during this very difficult time.

Yours sincerely,

**M.G. International Transports**
